

FIRE AND SECURITY FOR UTILITIES

Protecting staff, assets and continuity of power generation, critical to the infrastructure and economy.

FPG has a strong track record with power generation and utility businesses critical to the infrastructure and economy. Our fire and security solutions ensure that assets and staff are protected and that damage and interruption is minimised in the event of an incident, protecting the continuity of power supply.

- SCOTTISH WATER

- PIPER BRAVO
- UNITED UTILITIES
- SSE GROUP
- UNIPER UK LTD
- VENTIENT ENERGY
- THAMES WATER

CONTINUITY OF SUPPLY

Every power generation facility is a unique fire and security challenge based on the design and age of the facility. We understand and work around these challenges to protect the continuity of power supply, from generation, transmission to distribution of energy, and ensure staff and assets remain protected.

ACCREDITED & CERTIFIED

FPG is fully accredited and certified, providing solutions since 1989. Our in house team of consultants, designers, and fire risk assessors ensure that the systems we install are best-in-class and comply with legislation.

COMPLETE FIRE & SECURITY SOLUTION

FPG is a single-source provider for fire, security and safety solutions. Systems can be networked and integrated, improving ease of use and streamlining building operations.

A LONG TERM RELATIONSHIP

The installation of an FPG system is only the beginning of a long term relationship. Our maintenance agreements, 24/7 emergency service and local support ensure the long term safety and security of your site.
